Artisanal Know
how
With Maximum
Industrial
Efficiency

1

Raw Material

Boffo sources the raw materials for the production of tiles in its purest form. We make sure that the origins of the product that reaches to you are of top-notch quality. These raw materials express the strength of the further product that is to be developed and reinterpret the decisive elegance of a stone that is to be incorporated into a tile

2

Printing

We use advanced technologies to print on the surface of tiles. We make sure they interpret our thought process behind the surface and characteristics of its inspiration. This process emphasize on the style of minimalism and surface originality.

3

Firing

The tile must be heated intensely to strengthen it and give it the desired porosity. The tile goes through a low-temperature firing called bisque firing before glazing. This step removes the volatile from the material and most or all of the shrinkage. The body and glaze are then fired together in a process called glost firing inside a kiln.

FEATURES & APPLICATIONS

Elegance
And
Authenticity
for Your
Living Room

Our glossy surface can be used to construct kitchen counter tops, bedrooms, living room, staircase etc as it is lightweight, easy to clean, hygienic, and resistant to scratches, water, plus high temperatures.
